Topic

Lia McVicker, A Northern California Field Investigator, will present a report on a recent MUFON investigation she recently conducted. The case involves a Modesto man who reported and photographed UFO’s over his back yard on numerous occasions, along with associated paranormal activity. This case was assisted by fellow MUFON field investigator’s: Shirley Wheeler (Lia’s mother), Steve Reichmuth (N. Ca. MUFON Asst. State Dir.), Gene “Doc” Lipson, M.D. (Medical Director for MUFON) and a psychic. Lia will bring several photos and discuss the case in detail and the current status of the case. There will be time for questions and answers.

About the Presenter

Lia has an A.A. in Police Science, and a Paralegal certificate. She is a former Police Officer who now works for the DMV. She has held positions at the DMV for 5 years in: the field office, ID Theft in the Investigations Unit and currently in Information Services processing Subpoenas.

Lia has been a member of MUFON for approx. 8 yrs. and joined because she believes the time will come when there will be irrefutable evidence for life on other planets and she wants to be on the knowledgeable edge of truth. Lia’s approach to investigations is that while listening to someone talk about what they have seen or things that have gone on in their life, they may sound as if they are delusional, but listen as if you are their life line because they do need your help. They need you to be very interested in what is happening to them and understanding. They need to know they are not alone, be empathetic.
